*This book is dedicated to my parents,
my husband and
my lovely children – Rozie, Liyana and Amir –
for their continuous support and love.*

Preface

This book is an introduction to LaTeX for those who have not used LaTeX before. It is a wonderful software to typeset your document and especially helpful for post graduate students to write and structure their theses or dissertations. With LaTeX, you can effectively integrate your text with tables, figures, math symbols and references. The approach in this book is dedicated to Window users.

When I was writing my thesis, everyone around me used LaTeX and we had to learn it on our own. Thanks to my lab mates – especially Liam, Siti, Owen and Tammy. LaTeX used to be more complicated than it is now. Even while writing this book, a lot of things have improved and I had to change it from time to time, postponing the publication to cater for the ongoing changes.

The beauty about LaTeX is that you don't need to know everything. Most people only learn the basics and upgrade their skills using internet resources. My book is to help you do that – to grasp the basic essentials! There are many books on LaTeX available but it is difficult to find a book that can teach you from the very basics including how to compile for the first time. This book is like “LaTeX for the idiots”! I remember once when I was trying to compile but couldn't find the right way to do it. I had the right document but didn't know what to do. There are so many LaTeX editors, compilers and as a beginner, you'll simply get confused. So hopefully this book is helpful enough to give the first few introductory steps to get you acquainted. Learning LaTeX can be time consuming and this book is your short cut to it.

Have fun J !

TABLE OF CONTENT

<i>Preface</i>		<i>vii</i>
<i>Table of Content</i>		<i>ix</i>
1.0	Getting Started	1
1.1	Getting the Right Package!	1
1.2	Decide on Your LaTeX Editor	3
2.0	The Basics	11
2.1	Basic Terminologies	12
2.2	Typing Different Characters and Fonts	14
2.3	Bullets and Numbering	14
2.4	Other Lists	17
2.5	Making Boxes	17
3.0	Tables	21
3.1	Basic Table	21
3.2	Table with Multirow and Multicolumn	24
3.3	Table Spans Multiple Pages	26
4.0	Images and Figures	31
4.1	Using Wizards	31
4.2	Basic Commands	33
4.3	Incorporating More Than One Image	33
4.4	Rotating the Image	39
5.0	Math Environment	41
5.1	The Basics	41
5.2	Other Math Notations	42
5.3	More Examples	45

6.0	Organizing Your Document	51
6.1	Using <code>\input</code> Command	52
6.2	Using <code>\section</code> Command	55
6.3	Using <code>\include</code> Command	56
6.4	Using <code>\chapter</code> Command	59
6.5	Thesis Writing	65
7.0	References and Bibliographies	67
7.1	Using BibTeX	67
7.2	Creating A BibTeX File	69
7.3	Different Type of Entries	74
	<i>Index</i>	79
